Below is the complete telephone directory of the Clinton Engineer Works dated January 1945. There are approximately 5,000 names in this directory. Keep in mind that only a select few were privileged to have a phone. Most of the other 45,000 workers used pay phones in their living areas. This directory also includes a wealth of information about the infrastructure of Oak Ridge.

K-25, S-50	8816
To Report Unusual Incidents:	
Intelligence & Security Division—USED	5-7411

Service Calls

Information for Numbers Not Listed in Directory:	
Townsite Area	Dial "13"
All Other Areas	Call "Operator" *and ask for* "Information"
Repair Service—To Report Telephones Out of Order:	
Townsite Area	Dial "14"
All Other Areas	Call "Operator" *and ask for* "Repair Service"

How to Dial a Number

Before attempting to dial, remove the receiver from the hook and always listen for the dial tone—a steady "humming" sound which is usually heard immediately or within a few seconds after removing the receiver. The dial tone indicates that the equipment is ready for you to dial the number desired. Your call will not go through if you start to dial before you hear the tone.

If the dial tone is not heard within a short while, hang up your receiver, wait for a few seconds and try again. If the dial tone is not heard on the second attempt, it indicates that your line is in trouble and you should call "Repair Service" from another telephone and report the trouble.

Suppose, for example, you want to dial 5-2341.

1. Place your finger firmly in the dial opening over the figure "5".
2. Turn the dial around to the right until your finger strikes the finger stop.
3. Then lift your finger clear of the dial and let it return to its original position.
4. Proceed in the same manner to dial the other figures.

If, before you complete the dialing of a number, you find that you have made an error, or if your finger slips, hang up the receiver for a few seconds. Then remove it and upon hearing the dial tone proceed to dial the complete number again.

To dial "Operator" place your finger in the dial opening through which the word "Operator" is seen. Turn the dial around until your finger strikes the finger stop and release the dial.

After you have finished dialing, you should hear either the "ringing" or the "busy" signal within half a minute. If you do not hear either signal, hang up the receiver momentarily, then dial the complete number again.

To release your telephone from the telephone you dialed, hang up the receiver. Do not move the receiver hook or the dial while talking as this will break the connection. If, after dialing a number, you wish to dial another number, first hang up the receiver for a few seconds. Then remove it and, as soon as the dial tone is heard, proceed to dial the number desired.

To Make Local Calls Within Clinton Engineer Works

Telephone users in Townsite Area can call direct to *all* other telephones on the Project, by dialing the numbers shown in the directory.

All other Areas (Y-12, X-10, K-25) can dial, directly, numbers in their own area and *also all numbers in the Townsite Area (five digit numbers).* On calls to other numbers, it will be necessary to dial "Operator" (instead of "9") and give her the desired number.

To Make Calls to Knoxville

(*Note:* Class "C" Subscribers cannot call Knoxville).

Telephone users in the Townsite Area can call Knoxville by dialing "9"; and when a second (and slightly different) dial tone is heard, then dial the desired Knoxville number.

In all other areas it will be necessary to dial "Operator", give her the Knoxville number and she will complete the call.

To Make Calls to Clinton

In all areas dial "Operator" and ask for "Clinton". When the Clinton Operator answers, give her the desired number.

To Make Long Distance Calls

(*Note: Personal, including collect, calls cannot be made from Government official telephones*).

Dial Operator and give details in the following order:

1. The name of the city you are calling.
2. Your name.
3. Your telephone number.
4. The classification of the call: "official", "personal", or "collect".
5. Give additional information to the Long Distance Operator when she requests it.

To Dial the Other Party on Your Line

If you have a two-party line and wish to dial the other party, take the receiver off the hook, listen for dial tone and dial 191, after which you should hang up your receiver. Your bell as well as that of the other party on your line will ring at brief intervals. When the bell stops ringing remove the receiver and you will be connected with your party. If the bell does not stop ringing in from one to two minutes, indicating that the called party is not at home, you should remove your receiver momentarily in order to stop the bell and break the connection.

Classifications of Telephones

All telephones at Clinton Engineer Works are classified as follows:

a. Class A (Government Official)—Telephones authorized for the transaction of official business of the Government only, and which are required to have access to city trunk lines for the conduct of such business. All persons to whom Class A telephone facilities are furnished will take steps to insure that these facilities are not used for personal service.

b. Class B (Residence, Lump-sum Contractors, and Townsite Businesses)—Telephones which are authorized to have access to trunk connections for commercial telephone service, the cost of which is not chargeable to Government Funds.

c. Class C (Restricted Official) — Telephones restricted to general intercommunication service only and not having access to trunks for either outgoing or incoming commercial service.

d. Class D (Emergency)—Telephones restricted not only as in Class C, but to special classes of service, such as fire alarm, guard alarm, and watchman service.

Bills and Payments

Bills for Class B Subscribers will be rendered monthly by Roane-Anderson Company. The bill will include local service charges in advance for a one month period from date of bill and long distance charges incurred prior to the issuance of the bill.

All bills must be paid within ten days after date shown on bill. Delinquent subscribers will be subject to discontinuance of service.

Incoming Collect Calls

On all incoming collect toll calls the Clinton Engineer Works Operator must record whether the call is official or personal. If this information has not been requested before the connection is established the telephone user who has accepted the charges should signal the Clinton Engineer Works Operator and advise her of the call.

Telephone Service Orders

A telephone representative has been appointed by each of the principal Contractors and other main divisions of the Clinton Engineer Works. Requests for telephone service of all classifications, moves, disconnections, changes in listings, and installation information should be referred to these representatives. The Communications Officer will review all requests for telephone service to insure that existing regulations are being strictly followed.

Telephone numbers of the principal telephone representatives are given below:

1.	Carbide & Carbon Chemicals Corp.	8732
2.	Clinton Laboratories (Official)	6204
3.	Clinton Laboratories (Residence)	6259
4.	Ford, Bacon & Davis Inc.	8235
5.	Fercleve Corporation	8153
6.	Ferguson, H K. Company	8153
7.	Jones, J. A. Const. Co. Inc.	8318
8.	Roane-Anderson Company	5-7752
9.	Stone & Webster Eng. Corp.	7777
10.	Tennessee Eastman Corp. (Official)	7338
11.	Tennessee Eastman Corp. (Residence)	7166
12.	U. S. E. D.	5-3923
