

Section D

Section D provides information with regard to preservation, packaging and packing and marking of any package. It provides the preferred method of delivery for reports. Marking, in general includes an accompanying letter or other document which identifies the contract number, contract line item which requires the delivered item, and an indication whether the contractor considers the delivered item to be a partial or full satisfaction of the requirement, report or other deliverable delivered under the contract. Additionally, Section D sets forth the Government expectation that packaging of all work delivered pursuant to the statement of work will be in accordance with good commercial practices.

The Section D Table of Contents follows. Section D will be included in the final draft RFP to be issued at a later date.
